### EXPLANATION.

Learn the Moon's age from the quarters in the head of the Calendar with that enter the table, and in the two last columns opposite, you have High-water.

### EXAMPLE:

To find the time of high-water on the 1st of *January*, by the quarters the Moon's Age is seven days, in the two last columns opposite is twenty-one minutes after twelve, high-water.

N. B. The highest tides are the third day after the full and change of the Moon, and lowest the third day after the first and third quarters. At the highest spring tides, the current will run near three quarters of an hour, after it has done flowing or ebbing by the shore.
